- 1.Position & level:**With help,place the side cabinet against the wall carefully and mark the holes location with a pencil.Use a level to ensure it is perfectly horizontal.
- 2.Secure to wall:**Drill the holes with a percussion drill.Ensure the hole positions are horizontal.Use a hammer to nail the expansion bolt plugs into the four holes and keep them level with the wall.
Note:The expansion bolt plugs supplied are only suitable for solid stone/brick walls.
- 3.Place the side cabinet on the wall.**Use a screwdriver to tighten the screws into the expansion bolts at four holes.Ensure the cabinet is securely mounted.
- 4.Install shelves inside the cabinet:** Fix the small accessories(12pcs) into holes inside the cabinet by hand.Put the shelves on it.The shelves can be removed if necessary.
