

WARNING

Shower trays require special care to maintain their appearance and longevity. Avoid using common cleaning products, as they may contain agents that can irreversibly damage the surface.

CLEANING INSTRUCTIONS

1. Use only a **non-abrasive sponge** or **microfiber cloth** with soapy water to clean the tray.
2. Rinse thoroughly with **tap water**.
3. **Never use abrasive sponges** or cleaning tools, as they can scratch or damage the surface.
4. After cleaning, ensure the bathroom is **well-ventilated** to allow the tray to dry completely.

Maintenance and Cleaning of Shower Trays

PROHIBITED PRODUCTS

Avoid contact with the following substances, as they can cause permanent damage:

- Acetone or nail varnish removers
- Hair coloring products
- Products containing alcohol, acids, or solvents
- Anti-limescale maintenance products

CAUTION

- For deeper marks or stains, always **test the cleaning product** on a small, non-visible area before applying it to the entire surface.
- We recommend using the **removable drain cover** provided. If damaged, it can easily be replaced with a stainless steel cover.

IMPORTANT

- When unclogging the drain or drain hose, **avoid pouring products** containing acid or soda directly onto the tray.
- Use a **funnel** to pour such products directly into the drain, ensuring the tray surface is fully protected.
- These products can cause **irreversible damage** to the tray surface if not used carefully.
